

# IsoTack™

## Single-Ply Primer

### DESCRIPTION:

IsoTack is a primer shown to increase adhesion to stainless steel, aluminum, copper and concrete as well as weathered single-ply roofing systems. IsoTack is recommended to increase adhesion to AcryLinkG™ when installed over new TPO or PVC.

### APPLICATION:

- Most methods may be used, but due to the fast drying time, spray application is preferred.
- Skin surface should be free of heavy dirt, dust or oils. If cleaning is necessary, skin surfaces should be dry prior to primer application.
- Apply primer to achieve a dry film thickness of 1-2 mils. If corrosion is a problem, increase thickness to 3-4 mils.

### COVERAGE:

300-400 square feet per gallon

### STORAGE:

Protected from sunlight between 40°F and 80°F.

### PACKAGING:

- 5 gallon pail
- 55 gallon drum

### CAUTION:

Avoid prolonged contact with skin or breathing of vapors. Provide adequate ventilation.
